

## Weekend inspiration

### Magnetic Knife Rack

#### You will need:

- Alcolin Fix All
- 18mm plywood, cut to:
  - One 320mm x 280mm board
  - Two 150mm x 75mm brackets
- Drill bit and 35mm hinge boring bit
- Eight 30mm circular magnets
- Jigsaw
- 120-grit sandpaper

#### Instructions:

Measure and mark the position of your knives, making lines on the back of the board. Bore two circular recesses on each line for the magnets then cut two grooves (40mm x 18mm) in the bottom edge of the board, 50mm from each side. Glue the magnets in the holes with *Alcolin Fix All*. Cut a 40mm x 18mm groove in the middle of each bracket and fasten to the board. Sand the wood smooth before decorating as desired.
