

Bunny Inspired Shelf

You will need:

- Alcolin Ultra Wood Glue
- 18mm plywood
- Paint of choice

Instructions: Print the template provided and use it to saw 6 bunny shapes from the 18mm plywood with your jigsaw. Glue three shapes together with Alcolin Ultra Wood Glue and repeat with the other three shapes. This will form the two sides of your shelf. Glue the bunny-shaped sides on top of a base; one on each side. The length and width of your base will depend on your needs and the size of your bunnies. Paint the shelf in the colour of your choice. We used Annie Sloan paint in the colour English Yellow.
