

# Striking Hanging Planter

## You will need:

- Alcolin Ultra Wood Glue
- Four 120 x 22 x 22mm lengths of wood (for 1 planter)
- Wire
- Air plants

## Instructions:

Use the Alcolin Ultra Wood Glue to fix two of the pieces of wood across the other two to form a box-shape (as shown in the image alongside).

Drill holes through each of the four corners and thread the wire through them to create fixing points.

Add the air plants and hang them in groups for additional impact.
